- 1 MailAdviser's configuration file is updated and applied every 15 minutes from the Controller and can be forced to update immediately. The update frequency is configurable.
- 2 Some Office 365 updates can take days or even a week to be applied.

Reporting

- MailAdviser reporting is accessed via the Event Log View on the Controller. All actions are logged.
- Office 365 reporting is accessed via the Office 365 Portal View.

MailAdviser protects incoming and outgoing email

Actions Taken

MailAdviser is a preventative tool which uses pop-up dialogs to avert an issue, rather than email warnings after the email has been sent.

Feature	MailAdviser	O365 E3	O365 E5
Dialog Box Prompts	Yes	Partial	Partial
Dialog Appearance	Elegant	Basic	Basic
Ribbon Text Alerts	Yes	No	No
Message Blocking	Yes	Yes	Yes
