For your eyes only

An unencrypted introduction to Liverton Security

Helping businesses stay cyber-safe for 20 years

The original Liverton company was founded over 20 years ago by our CEO Richard Bourne, a highly experienced and respected cyber-security expert. Richard surrounded himself with a hand-picked team of dedicated, security-focused developers, systems engineers, consultants and support staff.

Our ongoing mission is to develop the world's best cyber-security. We develop all our own software products and innovate to stay ahead of the game.

"Our solutions are tailored to meet our customers' needs, with an ability to introduce new features and capability quickly. Updates are often based on direct customer feedback."

– Richard Bourne, CEO

Research never ends

Our solutions are designed to meet our customers' needs. To generate the next level of improvements to our products we continually learn how our customers use our products. Every enhancement is truly customer-driven.

Confidential information can go astray. However, it's more likely to be a misaddressed email, a hacked account, unencrypted data or someone simply not paying attention. Our products are designed to protect your organisation and your people.

Trusted by Government

We are a member of the New Zealand Government's Telecommunications as a Service (TaaS) panel offering services in the Managed Security Tower. We also offer Information Security Risk Management, Governance, Strategy and Assurance services.

An encrypted introduction to Liverton Security

LIVERTON
SECURITY LIMITED

Based in Wellington, the capital of New Zealand, Liverton Security is an influential and respected leader in the global cyber-security community.

Protect your organisation against viruses, malware, spam, emerging threats and other challenges. Safeguard employee communication and enforce security controls. Reduce risk with targeted threat protection, data leak prevention, and more.

Liverton Security's software products give people and organisations power to send and receive information, emails, files, messages and more. Securely, safely and with absolute confidence, for the intended recipient only.

Neutralise the threat

When digital technology ushered in a new world of opportunities, it also brought in new threats. In today's ever-shifting environment, protecting people, data, and organisations must never be left to chance. Liverton Security helps you neutralise threats in our digitally-driven world.

MailAdviser
Prevent emails and attachments being sent to the wrong person or with confidential content.
An intuitive interface presents unmissable key messages and alerts so users can quickly respond. MailAdviser seamlessly integrates with Microsoft Outlook.

SHIFT
Securely send files which are too large to be sent by email.
SHIFT secures files using PKI certificates. It behaves just like an email except securely and without the file limit. Once delivered, the file is permanently removed from the system.

SmartGate
A sophisticated email gateway content management filter.
SmartGate provides robust email protection against cyber criminals, competitors and email misuse by staff. Low cost scalable SmartGate includes threat intelligence, encryption, virus and malware protection, and data loss prevention tools.

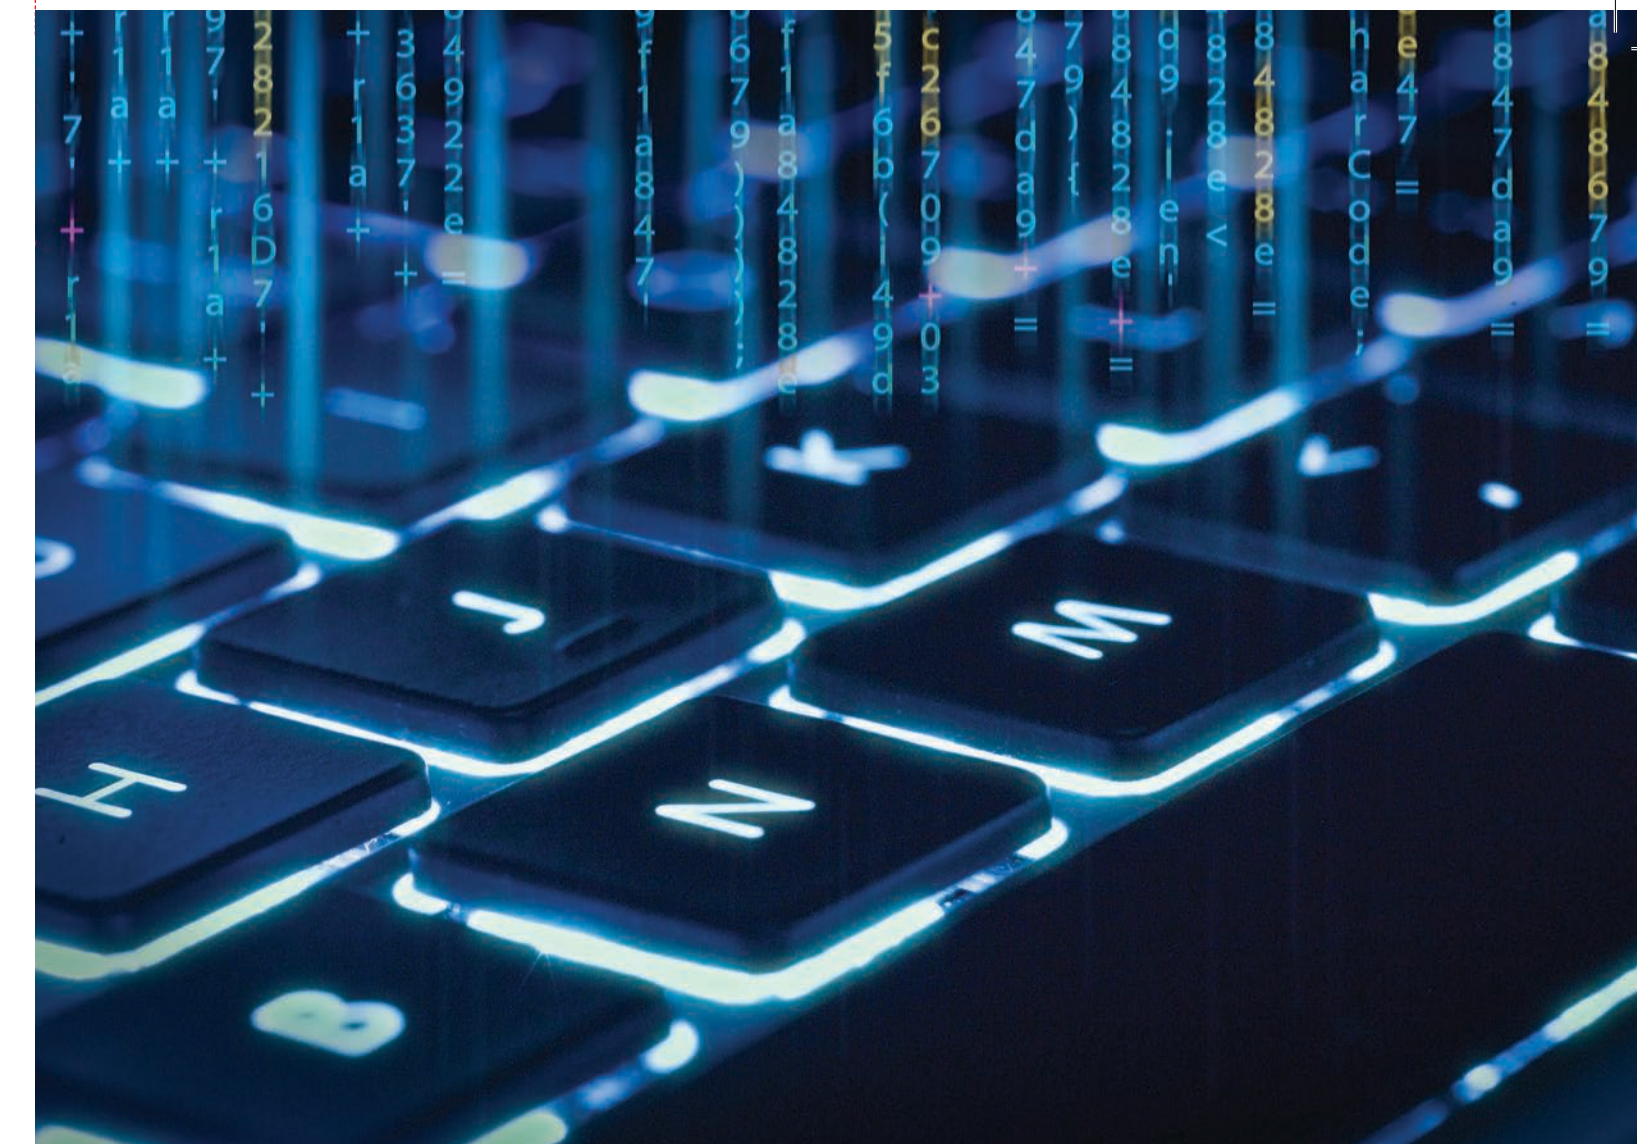

SEEMail
Ensures email traffic between participating New Zealand public sector organisations is secure.
The gateway-to-gateway encrypted email service uses PKI and S/MIME, and protects information classified as IN-CONFIDENCE, SENSITIVE or RESTRICTED.

LiveDNS
Manage and moderate your domains and zone records via a self-service portal.
Changes to zone records can be scheduled for a future date and time, and multiple changes can be queued. LiveDNS has multi-language support, including Te Reo Māori vowels with macrons.

GovtDNS
The Liverton Security Domain Name System is used by the New Zealand Government.
Manage and moderate .govt.nz, .parliament.nz, .health.nz and .mil.nz namespaces.

SchoolDNS
The Liverton Security Domain Name System is used by the New Zealand Ministry of Education.
Manage and moderate the .school.nz namespace.

Consulting
Expert email, secure email and PKI consultants.
We provide in-depth expert advice and guidance on a wide range of Internet cyber-security topics.

The best form of defence
We harness the power of innovation, ongoing research, and customer feedback. Nimble, relentless, responsive and focussed; we are committed to providing products that offer absolute peace of mind to all who rely on them.

Security made seamless
Our suite of customised security products work together to safeguard your emails, personal information and files by ensuring that they are sent and received securely. Superb integration is one reason why products, developed by us, are relied on by government, corporates and businesses operating in many sectors, in many countries.

Smarter and faster
We take the complex and simplify it, our products are highly configurable. You can be up and running in a few hours. Easy-to-use, easy-to-implement, our end-to-end solutions work together to protect your business.

"More than just protecting email. Not only do we prevent data loss, we protect your most valuable asset: your reputation."

– Richard Bourne, CEO
